SALESFORCE.COM BUSINESS INTELLIGENCE ACCELERATOR 2015

\$1,995

With the ForceBI solution, it has never been easier to get started with Business Intelligence (BI) for Salesforce.com. You minimize your investment and get an almost instant Return on Investment (ROI). ForceBI for Salesforce.com gives you a standardized Business Intelligence and Analytics solution in a matter of hours (many times in under an hour), creating a total BI infrastructure ready for analysis with any front-end tool out of the box. And it is perfectly tailored for your Salesforce.com data.

By utilizing the Microsoft stack of Business Intelligence tools, companies can use familiar technologies to present data to management and executives quickly and enable them the ability to slice, dice and analyze this information not only for historical and real-time analysis, but also correlating data for predictive analysis.

We provide an optimized SQL Server data warehouse specially constructed to work with SQL Server Analysis Services (SSAS) in a multi-dimensional database.

We provide the data transformation services utilizing our ForceBI custom SQL Server Integration Services (SSIS) components that work specifically with your Salesforce.com data.

**FOR A

FREE
INSTALLATION**

MICROSOFT BI STACK:

- Data Warehouse
- SSIS Package with customized controls
- SSAS CRM Cube

Includes Custom ForceBI SSIS Tools to ensure data integrity.

ForceBI.com Period Table Task tool for Salesforce.com creates an up-to-date Date and Time dimensional table to handle the most complex Period Hierarchies throughout your analysis.

ForceBI.com Data Integrity Task tool for Salesforce.com ensures that your data warehouse and SSAS multidimensional database maintain referential integrity throughout.

ForceBI.com Data Source tools for Salesforce.com are three controls that allow you to gather and incrementally maintain all standard and custom Salesforce.com object data via SQL Server Integration Services (SSIS) to transfer to your data warehouse.

Make mission-critical decisions quickly to stay ahead of competition and avoid oncoming issues far in advance!

SSIS and SSAS training is available so that you may extend your BI environment to add ERP, Social Media and other data that is important to your company.

Our BI infrastructure gives you the ability to use SQL Server Reporting Services (SSRS), Crystal Reports, Excel pivot tables, Excel Power Pivot and all other GUI tools that utilize SQL Server Analysis Services (SSAS) cubes.
